

# Consent for Dental Hygiene Services

Advantage Dental wants to help keep your community cavity-free and healthy. Dental hygienists from Advantage Dental will be available on site during the year to provide free dental services. These services do not replace regular dental care from a dentist.

If you have questions or would like more information about the services provided, please call 1-866-268-9631

**Your signature indicates that you have been informed of the risks and benefits of treatment, your questions have been answered, and that you consent to the treatment indicated above.**

As the parent/legal guardian, I agree to all of these statements:

- I give consent for dental services initialed/indicated above from Advantage Dental Clinics and Advantage Dental Group, PC (jointly "Advantage Dental"), and/or one of its representatives.
- The results of the oral hygiene services, including personal health information and scheduling information, may be shared between Advantage Dental, the dental provider (hygienist or patient's dentist), the community site, any listed insurance carriers, the dentist of record, any applicable Coordinated Care Organization, and/or the Dental Care Organization of record for purpose of treatment, payment or healthcare operations.
- I have been given a copy of the "Notice of Privacy Practices" and HIE (Health Information Exchange) Notification.
- This consent will remain active for 24 months unless revoked in writing or by calling an Advantage Dental representative.

*If you have dental insurance through Medicaid, the Oregon Health Plan or Healthy Kids, the hygienist will notify the plan of the services received.*

## Screening (Teeth Checkup)

A dental care professional will look in the mouth to check for changes in teeth that may indicate cavities or other oral health problems.

**Risk(s):** Decay or other problems could exist and get worse if not discovered.

**Alternative(s):** No checkup.

## Fluoride Coating

A temporary thin coating (also called varnish) put on the teeth to help protect from cavities. The coating is safe even if it is swallowed. It does not hurt or stain the teeth.

**Risk(s):** Allergy is not common.

**Alternative(s):** Daily or weekly fluoride rinses, fluoride foam, or fluoride gels applied at your dentist's office.

## Sealant

A dental sealant is a white coating put on the chewing surfaces of back teeth where cavities occur most often. Sealants make barriers on teeth that keep bacteria out and prevent cavities. They do not interfere with biting or chewing.

**Risk(s):** Sealants only protect the chewing surfaces. They can last for several years, but sometimes need to be replaced.

**Alternative(s):** Silver Fluoride. No sealants. Choosing not to use sealants could increase the chances you will develop decay in the chewing surfaces of the teeth.

Before Sealants

After Sealants

## Silver Fluoride

Fluoride with silver looks like water. It is painted on the teeth with a tiny brush and can heal early tooth decay. It goes on quickly, and does not hurt. If there are cavities in the mouth, silver fluoride can stop them from growing, and sometimes even heal them. Cavities that are stopped or healed with Silver Fluoride will turn dark brown or black. Teeth without cavities will not change color. If the color shows a lot, a dental professional can cover it with white filling material. Fillings may not be needed for cavities that are healed with Silver Fluoride.

**Risk(s):** If Silver Fluoride comes in contact with skin it will cause a small dark spot that will go away on its own in 1-2 weeks. If it comes into contact with existing white fillings it might stain.

**Alternative(s):** No Silver Fluoride applied. This could leave harmful bacteria on your teeth and increase the chance of tooth decay. Use fluoride toothpaste regularly and have fluoride varnish and sealants applied at your dental office.

### How Silver Fluoride looks on a tooth with a cavity

### How Silver Fluoride looks on a tooth with no cavity

Before

After

## Antiseptic for the Teeth (Iodine)

The antiseptic kills bacteria that cause cavities. When applied before the fluoride coating, it prevents many more cavities than the fluoride coating alone. Iodine is a normal part of our diet from food and is safe. It does not hurt or stain the teeth.

**Risk(s):** Allergic reactions are not common, but you should not have this treatment if you are allergic to shellfish.

**Alternative(s):** No iodine applied. This could leave harmful bacteria on your teeth and increase the chance of tooth decay.

## Protective Restoration

This is a simple tooth colored filling placed in a cavity to protect the tooth until a permanent filling can be done. It relieves pain and helps healing inside of the tooth. No shots are needed. It does not hurt.

**Risk(s):** Protective fillings may partially fall out, but what is left still protects the tooth.

**Alternative(s):** A regular filling or cap. Without care, the cavity may get bigger or become painful.

# SUMMARY OF NOTICE OF PRIVACY PRACTICES

**Our Responsibilities:** We are required by law to make sure that your protected health information is kept private and follow the privacy practices that are described in our full Notice of Privacy Practices. We may change our privacy policies any time and notify you. You can also request copy of our full Notice of Privacy Practices at any time. For more information about our privacy policies, contact us at 1-866-268-9631.

**Our Uses and Disclosures:** We use your health information to treat you, manage the health care treatment you receive, run our organization and to pay or bill for your health services. For example, we can use your health information and share it with other providers who are treating you.

There are other ways we are allowed to share your information. These other reasons are so that we can help the public, like public health and research. We have to follow the law before we can share your information for these reasons. We will not use or share your information other than what the law allows us to do; unless you tell us we can in writing. If you tell us we can, you may change your mind at any time.

**Your Rights:** When it comes to your health information, you have rights.

- You can ask to see or get a copy of your health information;
- You can ask us to correct your information;
- You can ask for confidential communications;
- You may ask us to limit what we use or share;
- You can get a list of those with whom we've shared information; and
- You can ask us for a copy of the full Notice of Privacy Practices at any time.

**Your Choices:** For certain health information, you can tell us your choices about what we share. In these cases, you have both the right and choice to tell us to:

- Share information with your family, close friends or others involved in payment for your care.
- Share information in a disaster relief situation.
- If can't tell us what you want us to do, for example if you are not conscious, we may share your information if we think it is what is best for you. We may also share your information when needed to lessen a serious threat to health or safety.

**Privacy Complaints:** If you are concerned that we have violated your privacy rights, our privacy policies, or if you disagree with a decision we made about your health information, you may contact us at 1-866-268-9631 or TTY 711. You also contact the US Department of Health and Human Services at 1-877-696-6775 or TTY 1-866-788-4089. Summary of Privacy Practices: This is a summary of our Notice of Privacy Practices. You can ask us for the full Notice of Privacy Practices at any time.
